

Student Management System - Database Schema

7 tables | PK = underlined (bold) | FK = italicic

STUDENTS

<u>student_id</u>	name	email	phone	department	year	date_of_birth	address	enrollment_date	ip_address
--------------------------	------	-------	-------	------------	------	---------------	---------	-----------------	------------

COURSES

<u>course_id</u>	course_code	course_name	department	credits	semester	instructor_name
-------------------------	-------------	-------------	------------	---------	----------	-----------------

ENROLLMENTS

<u>enrollment_id</u>	<i>student_id</i>	<i>course_id</i>	enrollment_date	status
-----------------------------	-------------------	------------------	-----------------	--------

GRADES

<u>grade_id</u>	<i>enrollment_id</i>	midterm_grade	final_grade	assignment_grade	total_grade	letter_grade	gpa
------------------------	----------------------	---------------	-------------	------------------	-------------	--------------	-----

ATTENDANCE

<u>attendance_id</u>	<i>enrollment_id</i>	attendance_date	status	notes
-----------------------------	----------------------	-----------------	--------	-------

USERS

<u>user_id</u>	username	password	role	email	ip_address	registration_date	created_date
-----------------------	----------	----------	------	-------	------------	-------------------	--------------

ACTIVITY_LOG

<u>log_id</u>	username	user_role	action	category	target_type	target_id	ip_address	user_agent	method	status_code	details	created_at
----------------------	----------	-----------	--------	----------	-------------	-----------	------------	------------	--------	-------------	---------	------------

Legend

<u>primary_key</u>	Primary Key	<i>foreign_key</i>	Foreign Key
---------------------------	-------------	--------------------	-------------

Relationships (Foreign Keys)

- STUDENTS.student_id → ENROLLMENTS.student_id (each enrollment belongs to one student)
- COURSES.course_id → ENROLLMENTS.course_id (each enrollment is for one course)
- ENROLLMENTS.enrollment_id → GRADES.enrollment_id (each grade record is for one enrollment)
- ENROLLMENTS.enrollment_id → ATTENDANCE.enrollment_id (each attendance record is for one enrollment)
